

“Experience
the HAYS
Difference”

- › Greater slope on all short sides of hopper and hydraulic vibrators on both long sides
- › All stainless steel augers and bearings
- › All stainless steel hardware
- › Hydraulic operated main doors and cleanout doors
- › Hopper cradle and trailer frame are manufactured together – no tubing that commonly rust out
- › Easy disassemble and reassemble
- › Front and rear ladder
- › Poly fenders
- › Agri-Cover tarp system
- › Air tank and brake valves (ABS System) are under cover at rear of the trailer
- › Hutch cast suspension system opposed to fabricated – for longer life
- › Bolt on landing gear and over-size sandshoes
- › Open area under tender makes it easier to wash out
- › Extra payload due to lower empty weight of HAYS tender
- › Central greasing station for all bearings
- › No metal pipes – all hydraulic hose enclosed in trough under stainless steel cover
